MUSICANOTE · Score Annotation for Education

Build Lesson Data on the Score

Analysis, knowledge, technique and videos are linked to specific bars and notes and stored as lesson data with positions. Share them by class, and find them again by list or by place in the score.

How an Annotation Is Built

1 Range
Measure, area (rounded or square), note, segment; box colour

2 Position
Anchored to the MusicXML position: page, bar, note

3 Type
Harmony, structure and note modes; harmony pre-filled from key, clef and first note

4 Attachments
Tags, YouTube, external links, images, PDFs

5 Sharing
Public or class members; several classes at once

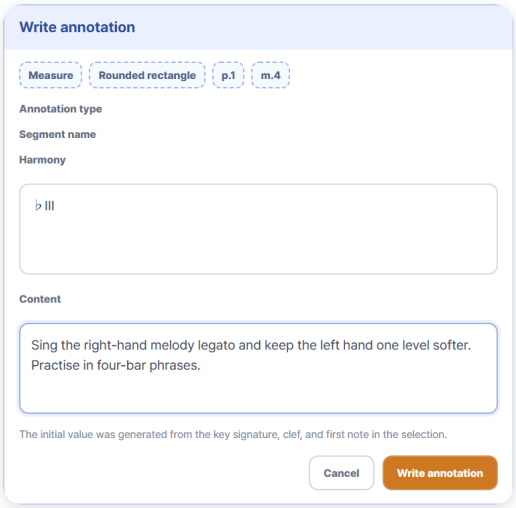

FOUR WAYS TO CHOOSE A RANGE

Measure
One bar or several

Area
Any part of the page, boxed

Note
Individual notes

Segment
A continuous passage

Annotation editor on musicanote.com · bar 4 selected, a lesson note being written (unpublished draft)

Lesson Data

- Collect each lesson's explanations; students review them on the score
- Positions and content are stored together — a basis for organising and analysing lesson records
- Mark the page directly with shapes, arrows, brackets and text

Writing and Managing

- Drafts are kept in the browser; publish after signing in
- Move annotations with export and import
- Find them in list view or by their place in the score
